- ASP and VBScript
- IIS and Apache Servers

Secondary Tech

- JSP / J2EE
 - Oracle and Informix Databases
 - Java, C
 - Dreamweaver, Photoshop
 - Visual Studio, WebSphere
-

Professional Experience

Full Stack Web Application Developer Contractor
CANTON SOCCER CLUB (2003 - Present)
46245 Michigan Ave, Canton, MI 48188

- www.cantoncup.net Designed and developed application, registrations and scoring reporting for the Canton Cup soccer tournament which hosts over 600 teams that play over 1000 games. The website handles nearly 500,000 hits during tournament week alone. Application includes an e-commerce that allows teams to pay online using Authorize.net processing. Recently converted original ASP/MSSQL system to PHP/MySQL using Yii framework.
- www.shurfields.com Designed and developed website that manages field scheduling in the city of Canton, Michigan. These fields have over 2000 games and events annually. The major benefit of this system is that it allows coaches to self-schedule their games, a rare commodity in youth soccer. ShurFields is Yii framework based with a MySQL database on a Linux platform. System has been adopted for 2017-2018 for the Michigan Tigers FC soccer club to manage their fields.

Full Stack Web Application Developer Contractor
MICHIGAN STATE YOUTH SOCCER ASSOCIATION (2017)
9401 General Drive, Plymouth, MI 48170

- www.playsoccermi.com website which connects new soccer players with clubs in their geographic area. Site utilizes google maps api and is PHP/MySQL based using the Yii framework.

Full Stack Web Application Developer Contractor (2015 - 2016)

- www.madetracker.com. This website tracks wristbands that are given to people for doing good deeds. I took this site from a simple HTML/SSI/PHP SQLite driven site to a PHP/MySQL site using the Yii2 framework. I also added PayPal driven wristband ordering and a complete administrative section that gave the site owner unprecedented access to his data. In addition to the new database platform, queries and indexes were also tuned to improve rendering of some pages from over 30 seconds to less than 3.
